

Zurich Builders Risk: Product & Policy Tips

March 2026

Jaclyn,

This month's newsletter for course of construction professionals includes a new segment with the Director of Product Underwriting, tips and tricks from our Director of Producer Training and Development, project examples and more.

Share this edition with colleagues to help everyone stay ahead in today's evolving landscape.

Evaluating Proximity to Water

Quickly determine whether a structure is located near tidal water or on a barrier island — two factors that can influence eligibility and premium.

Calculate Actual Cash Value (ACV) Confidently

Avoid underinsurance and claim discrepancies by determining ACV of an existing structure for a remodeling policy, even without a carrier calculator.

Terminology Spotlight — Temporary Storage Coverage

Covers property temporarily stored at a location other than a location which was reported, as long as it's clearly assigned to a covered building or structure. Coverage is limited to the Temporary Storage Limit listed in the Supplemental Declarations.

Lessons Learned from Builders Risk Claim Setbacks: Part 4 1-Hour Webinar | April 7 or 9 | 11 a.m. or 2 p.m. ET

Get proven guidance from our SVP, Head of Product Underwriting, on five real claims that went unpaid or underpaid and tips to avoid similar missteps.
